- Web : HTML5,CSS,PHP,JavaScript
- TOOLS : Xamp,Wamp,Android Studio

MINI PROJECTS

Title: Loan and Scholarship Management System   **Team Size: 3**
Technologies used: JavaScript,HTML,PHP,CSS

The front end is designed for the system of Loan and Scholarship Management using HTML5 , JS, CSS and the data are stored and retrieved using MySQL. The data are processed in the back end and the result will be displayed.

Title: Port Management System   **Team Size: 3**
Technologies used: Java,DBMS(Oracle)

A swing based interface where the input details required for berth and ship details are obtained and berth allocation is done with the help of berth area calculation and with the analysed with cargo dimensions. And it is stored in database.

Title: Whole Sale Management System   **Team Size: 3**
Technologies used:C++,Data Structures

Whole Management solution is specifically designed for wholesale business workflow, it tracks the details of the business transaction and to calculate the profit or loss, the solution is customized to meet the business needs.

Title: Water Sales System   **Team Size: 3**
Technologies used: Android,Java,

An android application is developed that receives order from the customers and deliver the required water bottles on date and updated to the customers.Firebase had a key role in database domain and authentication.

ONGOING PROJECT

Title: Time Series Motif mining using various text   **Team Size:3**
feature approach
Technologies used: R

The technology used in search engines involves various text extraction feature approaches. In this project, using Symbolic Aggregate approXimation(SAX) and using a well defined formula to assign weight to the text or pattern.The text that has more weight, that is, very rare and unique text so that while searching for a content in search engines that text tops the list.

CO CURRICULAR ACTIVITIES
